

Microsoft Technology Practice
Training and Certification Program

August 2021

Azure Exam Details

Role-Based Certification Program

The certification model is based on the three tiers of expertise, each requiring several different exams

Training and Exam Overview: AZ-900: Microsoft Azure Fundamentals

Start here

Who is this for?

Competencies

Training and Certification Resources

This exam is intended for people beginning to work with cloud-based solutions and services.

Azure Fundamentals can be used to prepare for other Azure role-based or specialty certifications, but it is not a prerequisite for any of them.

Knowledge and Experience:

Candidates should be able to demonstrate a fundamental knowledge of cloud concepts, as well as Azure services, workloads, security, privacy, pricing, and support.

In addition, candidates should be familiar with concepts of networking, storage, compute, application support, and application development.

Skills Measured:

- Describe cloud concepts
- Describe core Azure services
- Describe core solutions and management tools on Azure
- Describe general security and network security features
- Describe security, privacy, compliance, and trust
- Describe Azure pricing Service Level Agreements and Lifecycles

Microsoft Certified:
Azure Fundamentals

Training and Exam Overview: AZ-104: Microsoft Azure Administrator

Start here

Who is this for?

Competencies

Knowledge and Experience:

A candidate for this exam should have at least six months of hands-on experience administering Azure, along with a strong understanding of core Azure services, Azure workloads, security, and governance. In addition, this role should have experience using PowerShell, Azure CLI, Azure portal, and Azure Resource Manager templates.

Skills Measured:

- Manage Azure identities and governance
- Implement and manage storage
- Deploy and manage Azure compute resources
- Configure and manage virtual networking
- Monitor and back up Azure resources

Training and Exam Overview: AZ-204: Developing Solutions for Azure

Start here

Who is this for?

Competencies

Knowledge and Experience:

A candidate for this exam should have 1-2 years professional development experience and experience with Microsoft Azure. In addition, have ability programming in a language supported by Azure and proficiency in Azure SDKs, Azure PowerShell, Azure CLI, data storage options, data connections, APIs, app authentication and authorization, compute and container deployment, debugging, performance tuning, and monitoring.

Skills Measured:

- Develop Azure compute solutions
- Develop for Azure storage
- Implement Azure security
- Monitor, troubleshoot, and optimize Azure solutions
- Connect to and consume Azure services and third-party services

Training and Exam Overview: Azure Solutions Architect Expert*

Start here

Who is this for?

Competencies

Knowledge and Experience:

A candidate for this exam should have advanced experience and knowledge of IT operations, including networking, virtualization, identity, security, business continuity, disaster recovery, data platform, budgeting, and governance.

AZ-303: Microsoft Azure Architect Technologies Skills Measured:

- Manage Azure identities and governance
- Implement and manage storage
- Deploy and manage Azure compute resources
- Configure and manage virtual networking
- Monitor and back up Azure resources

AZ-304: Microsoft Azure Architect Design Skills Measured:

- Design monitoring
- Design identity and security
- Design data storage
- Design business continuity
- Design infrastructure

Microsoft Certified:
Azure Solutions Architect Expert

Training and Exam Overview: AZ-400: DevOps Engineer Expert*

Start here

Who is this for?

Competencies

Knowledge and Experience:

A candidate for this exam should have expertise implementing strategies for collaboration, code, infrastructure, source control, security, compliance, continuous integration, testing, delivery, monitoring, and feedback.

Additionally, a candidate must be familiar with both Azure administration and development and must be expert in at least one of these areas.

Skills Measured:

- Develop an instrumentation strategy
- Develop a Site Reliability Engineering (SRE) strategy
- Develop a security and compliance plan
- Manage source control
- Facilitate communication and collaboration
- Define and implement continuous integration
- Define and implement a continuous delivery and release management strategy

Training and Exam Overview: AI-900: Azure AI Fundamentals

Start here

Who is this for?

Competencies

Training and Certification Resources

Candidates for this certification should have foundational knowledge of machine learning (ML) and artificial intelligence (AI) concepts and related Microsoft Azure services.

This certification is intended for candidates with both technical and non-technical backgrounds. Data science and software engineering experience are not required; however, some general programming knowledge or experience would be beneficial.

Knowledge and Experience:

A candidate for this exam should have knowledge of common Machine Learning and Artificial Intelligence workloads and how to implement them on Azure.

Skills Measured:

- Describe AI workloads and considerations
- Describe fundamental principles of machine learning on Azure
- Describe features of computer vision workloads on Azure
- Describe features of Natural Language Processing (NLP) workloads on Azure
- Describe features of conversational AI workloads on Azure

Microsoft Certified:
Azure AI
Fundamentals

Training and Exam Overview: AI-102: Azure AI Engineer Associate

Start here

Who is this for?

Competencies

Knowledge and Experience:

A candidate for this exam should have knowledge and experience designing and implementing AI apps and agents that use Microsoft Azure Cognitive Services, Azure Bot Service, Azure Cognitive Search, and data storage in Azure.

In addition, a candidate should be able to recommend solutions that use open-source technologies, understand the components that make up the Azure AI portfolio and the available data storage options, and understand when a custom API should be developed to meet specific requirements.

Skills Measured:

- Analyze solution requirements
- Design AI solutions
- Implement and monitor AI solutions

Training and Exam Overview: AZ-140: Azure Virtual Desktop Specialty

Start here

Who is this for?

Competencies

Knowledge and Experience:

Candidates for this certification should have experience in Azure technologies, including virtualization, networking, identity, storage, backups, resilience, and disaster recovery. They should understand on-premises virtual desktop infrastructure technologies as they relate to migrating to Windows Virtual Desktop. These professionals use the Azure portal and Azure Resource Manager templates to accomplish many of their tasks. They might use PowerShell and Azure Command-Line Interface (CLI) for more efficient automation.

Skills Measured:

- Migrate SAP Workloads to Azure
- Design an Azure Solution to Support SAP Workloads
- Build and Deploy Azure for SAP Workloads
- Validate Azure Infrastructure for SAP Workloads
- Operationalize Azure SAP Architecture

Training and Exam Overview: AZ-600: Azure Stack Hub Operator

Start here

Who is this for?

Competencies

Training and Certification Resources

Candidates for this certification are Azure administrators or Azure Stack Hub operators who provide cloud services to end users or customers from within their own datacenter using Azure Stack Hub.

Responsibilities include to plan, deploy, package, update, and maintain the Azure Stack Hub infrastructure. They also offer hybrid cloud resources and requested services and manage infrastructure as a service (IaaS) and platform as a service (PaaS).

Knowledge and Experience:

A candidate for this exam should have significant experience managing and operating Azure Stack Hub environments. They should have a strong understanding of Azure, in addition to some knowledge of virtualization, networking, and identity management. They need to understand how Azure Stack Hub enables DevOps processes and the hybrid development model.

Skills Measured:

- Provide services
- Implement data center integration
- Manage identity and access
- Manage infrastructure

Training and Exam Overview: MS-203: Microsoft 365 Messaging

Start here

Who is this for?

Competencies

Training and Certification Resources

The Messaging Administrator deploys, configures, manages, and troubleshoots recipients, permissions, mail protection, mail flow, and public folders in both on-premises and cloud enterprise environments.

Responsibilities include managing message hygiene, messaging infrastructure, and hybrid configuration and migration. To implement a secure hybrid topology that meets the business needs of a modern organization, the Messaging Administrator must collaborate with the Security Administrator and Microsoft 365 Enterprise Administrator. The Messaging Administrator should have a working knowledge of authentication types, licensing, and integration with Microsoft 365 applications.

Knowledge and Experience:

This exam measures your ability to accomplish the following technical tasks: manage organizational settings and resources; plan and manage the mail architecture; plan and implement a hybrid configuration and migration; and secure the messaging environment.

Skills Measured:

- Manage organizational settings and resources
- Plan and manage the mail architecture
- Plan and implement a hybrid configuration and migration
- Secure the messaging environment

The Microsoft 365 Security Administrator collaborates with the Microsoft 365 Enterprise Administrator, business stakeholders, and other workload administrators to plan and implement security strategies and to ensure the solutions comply with the organization's policies and regulations.

This role proactively secures Microsoft 365 enterprise environments. Responsibilities include responding to threats, implementing, managing, and monitoring security and compliance solutions for the Microsoft 365 environment. Security Administrators respond to incidents, investigations, and enforcement of data governance.

Knowledge and Experience:

This exam measures your ability to accomplish the following technical tasks: implement and manage identity and access; implement and manage threat protection; implement and manage information protection; and manage governance and compliance features in Microsoft 365.

Skills Measured:

- Implement and manage identity and access
- Implement and manage threat protection
- Implement and manage information protection
- Manage governance and compliance features in Microsoft 365
